

Wildlife Habitat

Farmers have enrolled more than 30 million acres in the Conservation Reserve Program to protect the environment and provide habitat for wildlife.

- Farmers and ranchers provide food and habitat for 75 percent of the nation's wildlife.
- For every tree harvested in Alabama, five are planted. There are twice as many trees in Alabama today than there were 50 years ago.

“We want young people to appreciate the beauty of the forest and all the things that live there.”
